

# GO TOUCH DOWN

## — TRAVEL & TOURS —

### Cradle of Humankind

Embark on a fascinating journey to the beginning of mankind, exploring the *emergence of early life*, human evolution, and our present course as we forge our way into the future.

*The Cradle of Humankind is one of South Africa's 8 World Heritage Sites.*

Here you will see some of the *oldest* hominid (ape-man) fossils ever found, dating back as far as *3.5 million years ago*.

You will witness the best evidence of the complex journey that our species has taken to make us what we are.

It is *not only* a site of ongoing scientific discovery into our origins, but also a place to reflect upon who we are, where we came from and where we are headed.
